

Pre-Requisites

This is a reminder that you should not give permission to any Columbia College or General Studies student to take your class if the student has not yet completed the course pre-requisites (which are listed below). Our students who have not completed the pre-requisites will not receive major credit for the course unless they have received written permission from me to do so. You may use your discretion to decide whether or not students from other schools including visiting students may take your course.

Although they may need a review, you can expect that the students in your class are familiar with the topics covered in the prerequisite courses.
